The Oxford and Cambridge race is of added interest to Americans this year by reason of the prospective appearance of those ramous and famously trained crews in America and against our petted diarvard or Yale. So the comparison of time made at home and abroad becomes a matter of importance.

In the four-mile race Harvard and Yale have never equalled the time made by Oxford has venever equalled the time made by Oxford has year. In 1888 the distance was covered in 20.10. The records of the winning colleges in America State 1876 are given below.
